

Expert on climate change adaptation and health sector, multi Asia (Lao, Vietnam, Cambodia)

Contract **Short-term**Deadline **20/09/2015**

JOB DESCRIPTION

Location: **Multi Asia (Lao, Vietnam, Cambodia)**Project: **Regional Capacity Development for Strengthening Resilience to Climate Change in the Health Sector in the Greater Mekong Subregion (formerly Mitigating Human Impact of Climate Change)**

The expert will work in close coordination with the national epidemiologists to analyze epidemiological data and will be able to analyze climate change data and produce succinct written reports. In cooperation with the training specialist, the expert will prepare training modules, and in cooperation with the health economist, the expert will prepare an assessment on potential future investment opportunities on climate change in public health, outlining climate-resilient infrastructure and exploring private sector financing opportunities for the national and regional levels.

Tasks include:

- coordinate the analysis of disease prevalence and incidence;
- ensure proper collection of epidemiological data and supervise national consultants;
- identify data gaps and offer advice on approaches to estimate prevalence and incidence rates;
- lead preparation of training modules on climate change and public health;
- review relevant national documents such as national climate change strategies;
- prepare working papers that identify, assess, and determine investments and financial flows necessary to address climate change in the health sector;
- lead preparation of prefeasibility studies;
- prioritize capacity building needs of decision makers and technical staff in each country's ministry of health and selected provinces to contribute to building longterm capacity;
- develop advocacy materials for decision makers.

The position is estimated at 15 person-months, intermittent over 3 years.

QUALIFICATIONS

The expert must have experience in the design of climate change projects in the health sector.
