

BROWN

School of Public Health

Assistant, Associate or Full Professor Specializing in Reproductive Epidemiology
Department of Epidemiology
Brown University School of Public Health

The Epidemiology Department within the Brown University School of Public Health invites applications for an open rank specialist in reproductive epidemiology at the (tenure-track or tenured) Assistant, Associate, or Full Professor level. The position will be available July 1, 2017. Brown's School of Public Health is an important new undertaking by one of the nation's leading universities. The Department includes 12 tenured or tenure-track faculty, 3 additional research and teaching faculty, and trains both master's and doctoral students in epidemiology. Departmental faculty research focuses on environmental health, global health, HIV and other infectious diseases, cardiometabolic health and obesity, cancer, child health, mental health, genetics, nutrition, and epidemiologic methods. The Department has a strong record of research on early life influences on health through the lifecourse, the effect of environmental toxicants on pregnancy and children's health in the US and China, and the assessment of clinical interventions during pregnancy. In addition, there are plans to launch a new birth cohort study in Rhode Island will be launched in 2017. Current research in the Department includes both laboratory-based investigations and population-based studies. Substantive areas of interest that the Department wishes to enhance through this search include, but are not limited to: women's health, social and behavioral, clinical, nutritional, and/or chronic disease epidemiology.

Applicants must have a doctoral degree in epidemiology, MD/PhD, MD/MPH, or equivalent, with evidence of rigorous training and research in perinatal or reproductive epidemiology and a demonstrated capacity to secure external funding. The Epidemiology Department offers both master's and doctoral degrees and the successful candidate will be expected to teach graduate and/or undergraduate courses in epidemiology or perinatal and reproductive epidemiology and to mentor students. The level of the academic appointment will depend upon the overall experience, publication record, and external funding history of the candidate. Applicants for the Associate or Full Professor level (tenured) must also have a national/international reputation in perinatal or reproductive epidemiology, an independently funded program of research, and a proven track record of leadership in research, teaching and professional service.

Applicants should submit their Curriculum Vitae and a cover letter addressing the reasons for their interest in the position through Interfolio at the following link: <http://apply.interfolio.com/39068>. Applicants for the Assistant Professor rank should arrange for three letters of reference to be submitted. Please indicate in your letter of application the search number (PH-197) and whether you are applying for Assistant, Associate or Full Professor. Additional information is available about the Department at <http://brown.edu/academics/public-health/epidemiology/>.

Review of applications will begin on December 1, 2016. Full consideration will be given to all applications received by February 15, 2017. Applications received after the priority deadline may be reviewed until the position is filled or the search is closed. Potential applicants are invited to contact Search Committee Chair, Alison Field (Alison_Field@brown.edu) for further information about the position or Vickie S. Beaulieu (Vickie_Beaulieu@brown.edu, 401-863-2918) for application details.

Brown University is an Affirmative Action/Equal Opportunity Employer and actively solicits applications from women and minorities.
