Call for Action for Global Control of Lead Exposure to Eliminate Lead Poisoning

Lead poisoning is one of the most pervasive, well-established and preventable environmental hazards worldwide. The International Society for Environmental Epidemiology (ISEE) adds its voice to the call for a concerted global effort to eliminate lead poisoning.

See full text of the Call, together with its rationale, published in EPIDEMIOLOGY: http://journals.lww.com/epidem/Citation/2015/09000/Commentary___ISEE_Call_for_Action_for_Global.22.aspx

If you wish your name to be added as endorsing the Call for Action, please email Kathleen Ruff at kruff@bulkley.net with the following information:

1) Public interest organisations (such as health, environment, public interest organisations): Please provide the name of the organisation, the country or region in which it is active and the name and email of the person authorizing the endorsement.

2) Individual scientists: Please provide name, city and country where you are located, qualifications, and past and present titles (for identification purposes only).
